HAWK – Your Cloud-Native Security Partner A Modern Approach to SIEM

•Introduction to HAWK:

- **Cloud-Based SIEM:** Maintained by SBS, HAWK offers a modern, streamlined approach to security information and event management.
- **Compliance:** Designed to meet various security framework standards.

•The Cloud SIEM Advantage:

- **Scalability:** Leverages the power of cloud infrastructure for flexibility and cost-effectiveness.
- **Real-Time Analysis:** Centralizes, aggregates, normalizes, and evaluates event data in real time to detect patterns and threats swiftly.
- **Compliance Support:** Assists organizations in adhering to regulatory requirements.

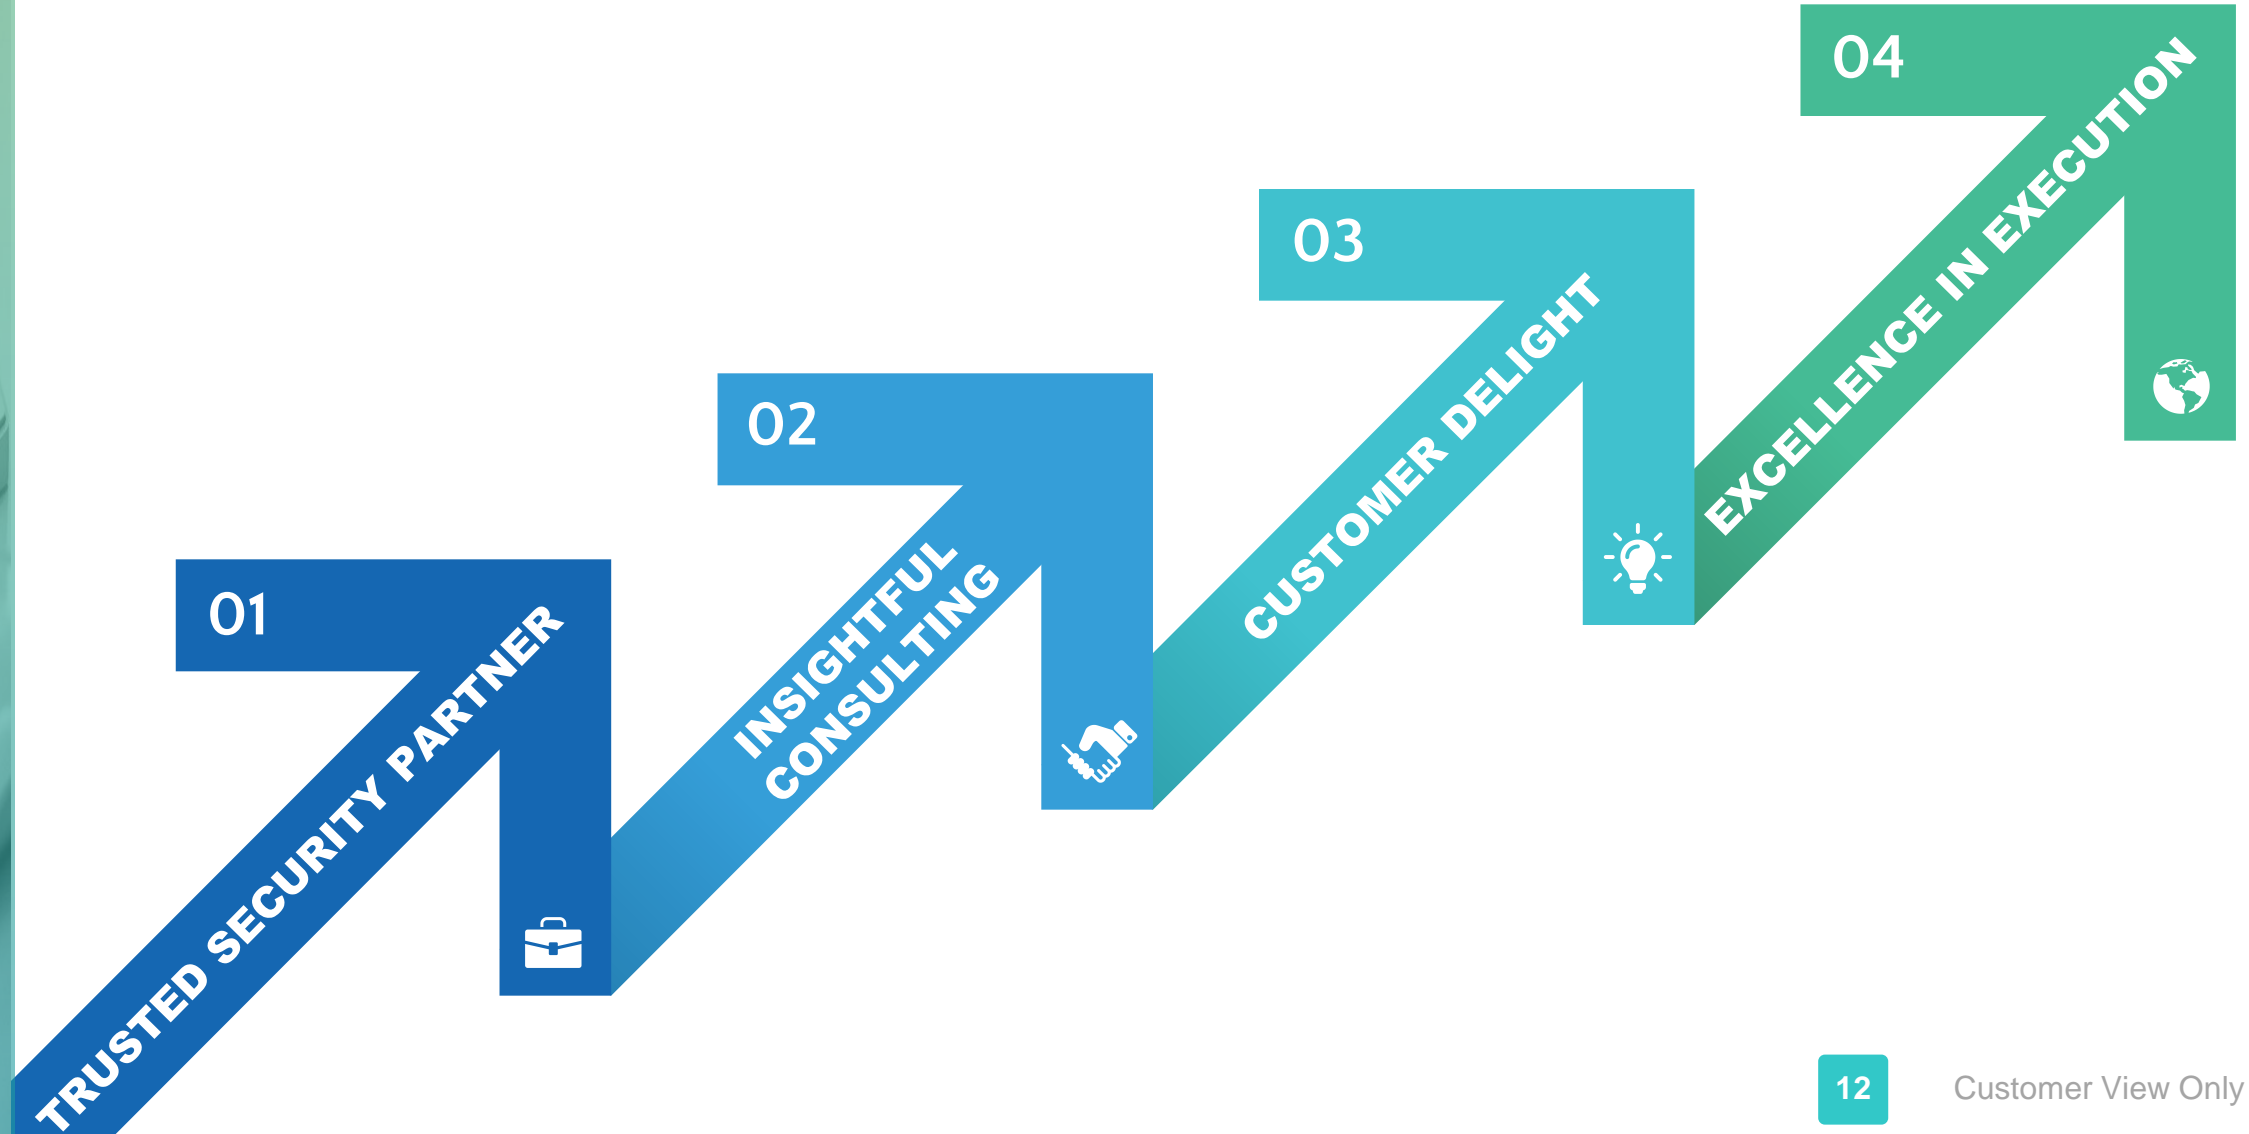

•Advanced Threat Detection:

- **AI and Deep Learning:** Utilizes advanced algorithms to outperform traditional threat detection methods.
- **Threat Capabilities:**
 - Identifies insider threats, targeted attacks, and fraud.
 - Incorporates a vulnerability management tool.
- **Three-Tier SOC Team:** Ensures rapid response to security incidents with a team of security analysts, incident responders, and threat hunters.
